Application review form: Academy Research Fellow 2021

Academy Research Fellows work on research plans of a high scientific quality. Academy Research Fellows have built extensive research networks and the funding allows them to develop their skills of academic leadership and establish themselves as independent researchers. Research posts as Academy Research Fellow are filled for five years.

Please provide both written feedback and numerical ratings to each of the following items. Write evaluative rather than descriptive comments.

- Bullet text refers to technical instructions for the online services (SARA).

Below is the rating scale for the pre-review (before the panel meeting) and the final review (in the panel meeting). The consistency between the numerical rating and the written comments is particularly important.

<table>
<thead>
<tr>
<th>Draft rate</th>
<th>Description</th>
<th>Final rate</th>
</tr>
</thead>
<tbody>
<tr>
<td>6 (outstanding)</td>
<td>Demonstrates extremely high novelty and/or innovation; has potential to substantially advance science at global level; presents a high-gain plan that may include risks</td>
<td>6 (outstanding)</td>
</tr>
<tr>
<td>5 (excellent)</td>
<td>Is very good in international comparison – contains no significant elements to be improved</td>
<td>5 (excellent)</td>
</tr>
<tr>
<td>4 (good)</td>
<td>Is in general sound but contains some elements that should be improved</td>
<td>4 (good)</td>
</tr>
<tr>
<td>3 (fair)</td>
<td>Is in general sound but contains important elements that should be improved</td>
<td>1–3 (fair to insufficient)</td>
</tr>
</tbody>
</table>
1 Quality of research described in plan

1.1 Scientific quality, novelty and innovativeness of research Sub-rating (1–6)
Significance of project; objectives and hypotheses; ambitiousness and state of the art of objectives (possible novel concepts and approaches or development across disciplines); scientific impact of research; potential for breakthroughs or exceptionally significant outcomes; etc.

- See item 1 Aim and objectives in the research plan.

1.2 Implementation of research plan Sub-rating (1–6)
Feasibility of project (bearing in mind extent to which the proposed research may include high risks); materials, research data and methods; human resources and management of research tasks; research environment including research infrastructures; identified potential scientific or methodological problem areas and mitigation plan; etc.

- See item 2 Implementation in the research plan.

2 Competence of applicant, quality of research collaboration

2.1 Competence and expertise of applicant Sub-rating (1–6)
Personal merits and scientific expertise of applicant, including appropriateness and sufficiency for the proposed project; applicant’s professional competence and independence; experience in
supervising PhD candidates and/or postdoctoral researchers, experience of working in different research environments across international and/or sectoral borders; etc.

- See item 3.1 Project personnel and their project-relevant key merits in the research plan.
- See most relevant publications and other key outputs in the application form.
- See CV of applicant in the application form.
- See complete list of publications.
- See previous mobility in the application form.

2.2 Research team and significance of research collaboration including researcher mobility

Sub-rating (1–6)

Complementary expertise of applicant’s team, if relevant (i.e. project personnel directly working/funded for the project); contribution of national and/or international research collaboration (i.e. collaborators engaged in the project with their own funding) to the success of the project; complementary expertise and research environment of collaborators in terms of project implementation; significance of planned mobility for implementation of research plan and researcher training; quality of receiving organisation in the field of research; appropriateness of length and timing of mobility period(s); etc.

- See item 3.1 Project personnel and their project-relevant key merits in the research plan.
- See item 3.2 Collaborators and their project-relevant key merits in the research plan.
- See mobility plan in the application form.
- See attached letter(s) of collaboration.

3 Responsible science

3.1 Has the applicant considered the following aspects of responsible science properly in the application?
See item 4 Responsible science in the research plan.
The Academy of Finland is committed to promoting research integrity, responsible conduct of research and the principles and practice of equality and nondiscrimination and open science. See ‘Instructions for reviewing’ for further information.

3.1.1 Research ethics
- Yes (no comment needed)
- No, please comment in item 3.2.1

3.1.2 Promotion of equality and nondiscrimination within project or in society at large
- Yes (no comment needed)
- No, please comment in item 3.2.1

3.1.3 Open access to research publications
- Yes (no comment needed)
- No, please comment in item 3.2.1

3.1.4 Data management and open access to data
- Yes (no comment needed)
- No, please comment in item 3.2.1

3.2 Comment on responsible science, societal effects and impact

3.2.1 Provide further comments if responsible science aspects above (3.1.1 – 3.1.4) have not been properly considered.

3.2.2 Additional comments on societal effects and impact
You are also encouraged to comment on the societal effects and impact, including principles of sustainable development.
4. Overall assessment and rating

4.1 Main strengths and weaknesses of project (no numerical rating)

Please select the major strengths and weaknesses of the application.

Main strengths (select all relevant aspects):

- scientific quality
- innovativeness and novelty value
- impact within scientific community
- feasibility of research plan
- overall competence and independence of applicant
- competence and expertise of applicant in terms of project implementation
- expertise of research team in terms of project implementation
- significance of collaborative networks in terms of project implementation
- mobility plan in terms of project implementation and researcher training

Main weaknesses (select all relevant aspects):

- scientific quality
- innovativeness and novelty value
- impact within scientific community
- feasibility of research plan
- overall competence and independence of applicant
4.2 Justifications and comments

Please justify the selections above by briefly describing the main strengths and weaknesses of the application.

<table>
<thead>
<tr>
<th>5 Overall rating</th>
<th>Rating (1–6)</th>
</tr>
</thead>
</table>

- Please note that the final rating should not be a mathematical average of the sub-ratings. For example, the application should not be penalised if it has a slight weakness in one evaluation item that is later strengthened in another item (e.g. lack of some expertise in a local team but compensated through international collaboration).

Ranking based on the panel discussion (the ranking is made during the panel meeting)

Your application was ranked [ordinal number] of all [number] [Funding instrument name] applications reviewed in this panel. Only applications with the final rating of 5 or 6 were ranked. The [Funding instrument name] applications addressed to the Research Council for [Research Council name] were reviewed in a total of [number] panels.
