7. Academy Projects: Average funding per project by organisation ..... 5
8. Reviewers by country of their organisation ..... 6
9. Tables and figures ..... 7
Appendix table. Disciplinary classification ..... 19

## 0. Introduction

- This statistics document describes the funding statistics on the applications submitted to and the researchers and projects funded in the Academy of Finland's September 2020 call. The funding instruments include Postdoctoral Researchers, Academy Research Fellows, Academy Projects and Clinical Researchers.
- A few applications that were not processed or reviewed are excluded from the application numbers.
- Each table and figure is briefly described in chapters 1-8. The tables and figures are presented in chapter 9.
- In most of the tables, the results of the September 2020 call are compared to the previous two calls in 2019 and 2018. In the tables, however, the years 2019-2021 refer to the years when the funding decisions were made. The calls were opened in the previous year.
- In terms of Academy Projects, the data for 2019 (i.e. September 2018 call) include the call for Academy Projects and the call for Academy Projects by early-career researchers. By combining these calls for 2019, the data for 2019, 2020 and 2021 are comparable.
- The total number of funded researchers and projects in 2021 may eventually slightly increase if research councils have funding left over from other calls and decide to fund Postdoctoral Researchers, Academy Research Fellows, Academy Projects or Clinical Researchers from the reserve list.
- More information about the funding statistics is available from the Division of Strategic Planning and Analysis at the Academy of Finland.
- The funding statistics on the September 2020 call were published in June 2021.
- The material is available on the Academy of Finland's website.

## 1. Applications and funded projects by funding instrument and research council

- Tables 1.1-1.3 describe the number of applications, the number of funded researchers/projects and the success rate by research council (Biosciences, Health and the Environment; Culture and Society; Natural Sciences and Engineering) and funding instrument (Postdoctoral Researchers; Academy Research Fellows; Academy Projects) in 20192021.
- In 2021, the research councils granted funding to 107 Postdoctoral Researchers (success rate 13\%), 67 Academy Research Fellows (success rate $11 \%$ ), and 211 Academy Projects with a total of 265 subprojects. The success rate for the Academy Projects was $15 \%$ (consortium subprojects have been counted as separate projects).

## 2. Applications and funded projects by organisation

- Table 2 describes the number of applications, the number of funded projects and the success rate by organisation in 2019-2021. The data include Postdoctoral Researchers, Academy Research Fellows, Academy Projects and Clinical Researchers. In the data for Academy Projects, consortium subprojects have been counted as separate projects.
- In the September 2020 call, the Academy of Finland received a total of 3,185 applications and the average success rate was $14 \%$.

## 3. Applications and funded projects by disciplinary group

- Table 3 describes the number of applications, the number of funded projects and the success rate by disciplinary group in 2019-2021. The data include Postdoctoral Researchers, Academy Research Fellows, Academy Projects and Clinical Researchers. In the data for Academy Projects, consortium subprojects have been counted as separate projects.
- The disciplinary groups are based on the primary research field of the applications (see Appendix table for the detailed classification).
- In the September 2020 call, the Academy of Finland received a total of 3,185 applications and the average success rate was $14 \%$.

## 4. Applications and funded projects by funding instrument and gender of applicant

- Table 4 describes the proportion of women among applicants (applications) and funded researchers or projects by funding instrument in 2019-2021. The totals include data in the following gender categories: female, male, other/prefer not to answer. In the data for Academy Projects, consortium subprojects have been counted as separate projects.
- For Postdoctoral Researchers in 2021, women accounted for $46 \%$ of applicants and 48\% of funding recipients.
- For Academy Research Fellows in 2021, women accounted for $42 \%$ of applicants and $40 \%$ of funding recipients.
- For Academy Projects in 2021, women accounted for $34 \%$ of the applications and $36 \%$ of the funded projects.

## 5. Applications and funded projects by funding instrument and nationality of applicant

- Table 5.1 describes the proportion of applications and funded Postdoctoral Researchers by nationality in 2019-2021. In 2021, foreign nationals accounted for $48 \%$ of applicants and $41 \%$ of funding recipients.
- Table 5.2 describes the proportion of applications and funded Academy Research Fellows by nationality in 2019-2021. In 2021, foreign nationals accounted for $38 \%$ of applicants and $37 \%$ of funding recipients.
- Table 5.3 describes the proportion of applications and funded Academy Projects by nationality in 2019-2021. In 2021, foreign nationals accounted for $17 \%$ of applications and $14 \%$ of funded projects. In the data, consortium subprojects have been counted as separate projects.

## 6. Rating distribution by funding instrument

- Tables 6.1-6.3 describe the distribution of final ratings of applications (\%) in the September 2020 call by funding instrument. The funding decisions were made in 2021.
- The number of Academy Project applications reflects the total number of reviewed projects, not subprojects.
- Applications were reviewed based on a scale from 6 (outstanding) to 1 (poor). In the data, the score is the overall rating of an application given by a panel of international experts, or the average of the overall ratings if the application was reviewed in more than one panel. The average of the ratings given by independent experts was used if the application was not reviewed in a panel.

## 7. Academy Projects: Average funding per project by organisation

- Table 7 describes the number of funded projects, total funding and the average funding per funded Academy Project by organisation in

2019-2021. Consortium subprojects have been counted as separate projects. Academy Project funding is typically granted for four years.

- In case the principal investigator has changed organisations, the granted funding by organisation is reported according to the original funding decision.
- In the 2021 funding decisions, the average funding granted per project was around 427,881 euros.

## 8. Reviewers by country of their organisation

- Table 8 and figure 1 describe the number of reviewers by country. Country refers to the country of the reviewer's home organisation.
- A total of 722 reviewers (of which $36 \%$ were women) from 31 countries participated in the review of applications submitted to the September 2020 call.
- The total number of reviewers comprises 631 panel members and 91 independent experts.
- Some of the 70 panels also reviewed applications that had been submitted to other calls than the ones included in the funding statistics on the September 2020 call. This slightly increases the total number of reviewers.
- In the September 2020 call, the five most typical countries where the reviewers worked were the United Kingdom, Germany, Sweden, the Netherlands, and Norway.

| Total | 1,693 | 1,696 | 1,746 | 321 | 268 | 265 | 19\% | 16\% | 15\% |

Table 2. Applications, funded projects and success rate by organisation in 2019-2021. The table only includes organisations with at least 10 applications in 2019, 2020 or 2021. The data include Postdoctoral Researchers, Academy Research Fellows, Academy Projects and Clinical Researchers. In the data for Academy Projects, consortium subprojects have been counted as separate projects. A star (*) in the application column indicates that the organisation had less than 10 applications that year. In the funded projects or success rate column, a star (*) indicates that the organisation had less than 5 funded projects that year. The organisations are listed in alphabetical order. | Total (incl. organisations not listed above) | 321 | 268 | 265 | 134.0 | 116.5 | 113.4 | 417,538 | 434,676 | 427,881 |

Table 8. Number of reviewers by country in the review of applications submitted to September 2020 call. The total number of reviewers comprises 631 panel members and 91 independent experts. Country refers to the country of the reviewers' home organisation, not to their nationality. Source: Academy of Finland.

| Country of reviewer's home organisation | Number of <br> reviewers | Proportion <br> of reviewers |
| :--- | ---: | ---: |
| United Kingdom | 198 | $27 \%$ |
| Germany | 85 | $12 \%$ |
| Sweden | 67 | $9 \%$ |
| Netherlands | 54 | $7 \%$ |
| Norway | 42 | $6 \%$ |
| France | 37 | $5 \%$ |
| Italy | 36 | $5 \%$ |
| Denmark | 36 | $5 \%$ |
| Spain | 32 | $4 \%$ |
| Belgium | 25 | $3 \%$ |
| Switzerland | 19 | $3 \%$ |
| Austria | 15 | $2 \%$ |
| United States | 13 | $2 \%$ |
| Portugal | 11 | $2 \%$ |
| Ireland | 10 | $1 \%$ |
| Estonia | 8 | $1 \%$ |
| Canada | 6 | $1 \%$ |
| Other countries total (less than 5 reviewers per country) | 28 | $4 \%$ |
| Total | 722 | $100 \%$ |

## Appendix table. Disciplinary classification

Appendix table. Disciplinary classification which has been used in the Academy of Finland funding statistics on September calls. Source: Academy of Finland.

| Disciplinary group | No | Primary research field |
| :---: | :---: | :---: |
| Engineering | 101 | Architecture |
| Engineering | 102 | Food engineering |
| Engineering | 103 | Energy engineering |
| Natural sciences | 104 | Physics |
| Natural sciences | 105 | Geosciences |
| Natural sciences | 106 | Chemistry |
| Engineering | 107 | Mechanical engineering and manufacturing technology |
| Natural sciences | 108 | Computational science |
| Engineering | 109 | Medical engineering |
| Natural sciences | 110 | Mathematics |
| Engineering | 111 | Materials science and technology |
| Engineering | 112 | Nanoscience and nanotechnology |
| Engineering | 113 | Process technology |
| Engineering | 114 | Construction and municipal engineering |
| Engineering | 115 | Electrical engineering and electronics |
| Engineering | 116 | Industrial biotechnology |
| Natural sciences | 117 | Computer science |
| Natural sciences | 118 | Statistics |
| Engineering | 119 | Industrial management |
| Natural sciences | 120 | Astronomy |
| Engineering | 121 | Environmental engineering |
| Biosciences | 201 | Biochemistry, biophysics |
| Biosciences | 202 | Ecology, evolutionary biology and ecophysiology |
| Biosciences | 203 | Plant biology |
| Biosciences | 204 | Developmental biology and physiology |
| Biosciences | 205 | Microbiology |
| Biosciences | 206 | Genetics |
| Biosciences | 207 | Cellular and molecular biology |
| Biosciences | 208 | Systems biology, bioinformatics |
| Environmental, agricultural and forest sciences | 209 | Environmental science |
| Environmental, agricultural and forest sciences | 301 | Food sciences |

| Disciplinary group | No | Primary research field |
| :---: | :---: | :---: |
| Environmental, agricultural and forest sciences | 302 | Agricultural sciences |
| Environmental, agricultural and forest sciences | 303 | Forest sciences |
| Medical and health sciences | 401 | Biomedicine |
| Medical and health sciences | 402 | Veterinary medicine |
| Medical and health sciences | 403 | Pharmacy |
| Medical and health sciences | 404 | Dental science |
| Medical and health sciences | 405 | Nursing science |
| Medical and health sciences | 406 | Public health research |
| Medical and health sciences | 407 | Clinical medicine |
| Medical and health sciences | 408 | Sport sciences |
| Medical and health sciences | 409 | Nutrition |
| Medical and health sciences | 410 | Environmental health research |
