

Description of compliance with and commitment to the 'Do No Significant Harm' (DNSH) principle

Please evaluate the possible effects of your proposed project on the six environmental objectives in the table below by responding to the question: can the project execution or application of its results have significant harmful effects on the environment or climate (yes/no, justification)?

In case your proposed project involves piloting or purchase of infrastructure, please comment on these aspects from the point of view of environmental effects as well.

For more details on the DNSH principle, see the call text available on the Academy's website.

Environmental objective	Yes (tick)	No (tick)	If 'No', please provide a brief justification If 'Yes', please comment on the significance, extent and duration of the harmful effect.
1. Climate change mitigation			
2. Climate change adaption			
3. The sustainable use and protection of water and marine resources			

4. The transition to a circular economy			
5. Pollution prevention and control			
6. The protection and restoration of biodiversity and ecosystems
