1. Objectives of the Strategic Research Council (SRC) funding

The Strategic Research Council (SRC) funds high-quality research that has potential for societal impact. The funding is based on open competition, independent peer review and responsible science. The research should seek to find concrete solutions to grand challenges that require multidisciplinary approaches. The SRC requires a multidisciplinary approach that includes collaborations of multiple research organisations. An essential element of such research is active collaboration between those who produce new knowledge and those who use it.

2. Role of experts and the Strategic Research Council

Experts are invited to review the societal relevance and impact of the submitted research applications. The experts are esteemed, national and international experts in the field. The experts have been chosen based on their expertise on the research fields as well as societal relevance and impact pertinent for the programme call at hand. Another independent group of experts will evaluate the scientific quality of the applications. After receiving the panel review reports, the SRC will decide which consortia will be funded based on the panels' final reviews and at its own discretion.

Research Council of Finland

2.1 Panel chair

Each panel is assigned a chair who is one of the panel members. The duty of the chair is to chair the panel meeting via an online platform (Teams), lead the discussion and ensure that all applications are reviewed in a responsible and fair manner. The chair also has duties as a panel member.

2.2 Individual reviewers and panel members

Experts may act as individual reviewers and panel members. The duties of individual reviewers are to review and write review reports of the applications allocated to them (before the panel). As a rule, individual reviewers also participate in the panel as panel members. All panel members are expected to actively participate in the panel meeting. For each application, one of its draft reviewers will be a summariser in the panel meeting to write the final panel summary review for the application.

2.3 Research Council of Finland officials

The Research Council of Finland's officials invite the panel members and, if needed, additional external reviews to support the panel, provide instructions on the review process and organise instructive webinars and pre-panel meetings when relevant. The officials also take care of the practical arrangements in the panel meeting and follow that the review process is carried according to the Research Council's established procedures.

2.4 Decision making body

After receiving the panel review reports, the SRC will decide which consortia are funded based on the panels' final reviews and at its own discretion.

3. Review

3.1 Review criteria and rating scale

The main criteria in the review are:

- Project's relevance to the programme
- Project's interaction with society
- Competence and expertise

Responsible science should be considered throughout the application.

The specific review criteria are presented in the review form.

Written reviews: Well-made draft reviews will make the panel work more efficient and be of great help for preparing the final reviews at the panel meeting. Evaluative comments are particularly valuable to the decision-making bodies. Also, after the funding decisions have been made, the applicants can access the panel summary assessment on their own applications. The summary assessment includes the names of

the panel members, barring COIs. The reviews provide the applicants with important feedback. Reviewers should therefore:

- write evaluative comments and give justifications using full sentences,
- avoid descriptive comments and copying text directly from the application,
- write comments under each review-item,
- maintain coherence throughout your comments and give constructive feedback which can be used, if agreed, as such in the panel review report.

Numerical rating: The consistency between the numerical rating and the written comments is particularly important. For the draft review an overall rating (1-6) is given. The scale used is explained below. Based on the draft reviews and the discussion, the panel will decide on its final rating for each application.

Rating	Description of grade requirements
6 extremely significant	research of crucial relevance to users, i.e., such novelty or timeliness and promise that an extremely significant contribution to policy or practice is likely; demonstrates exceptional novelty and innovation to address a solution to an important problem or a critical barrier
5 very significant	research of very high relevance to users, i.e., such novelty or timeliness and promise that a very significant contribution to policy or practice is likely; high potential to address a solution to an important problem or a critical barrier
4 significant	research of high relevance to users, i.e., such novelty or timeliness and promise that a significant contribution to policy or practice is likely
3 moderate	research of relevance to users, i.e. such novelty or timeliness and promise that a moderate contribution to policy or practice is likely
2 limited	research that will add to understanding but that might not be of sufficient relevance or urgency to influence policy or practice
1 poor	research is not considered relevant; proposal is in need of substantial modification or improvement

3.2 Individual review (draft review)

Each application is assigned to at least two individual reviewers, who can be either panel members or experts outside the panel. Reviewers write individual draft reviews and give overall ratings (1-6) to the applications. Applications will then continue to the panel review phase. Therefore, the **deadline for submitting the individual review reports is essential** to enable the preparation of the panel meeting following the individual review phase.

3.3 Review panel meeting (online)

The panel members have access to all applications submitted to the panel, barring conflicts of interest (see Review principles, section 1.3). Also, the draft reviews for individual applications will be compiled and these draft reviews will be made available to all panel members at latest one week before the meeting. However, please note that the compiled review reports will only be made available to panel members once all draft reviews have been submitted to the Research Council.

At the panel meeting, the panel will discuss the applications. The individual reviewers appointed to an application will present their opinion on the application first followed, if desired, by other panel members. The panel prepares one joint panel review report on each application based on its discussion during the panel meeting. Based on the overall rating and the panel discussion, the panel decides the final overall rating for the application.

It is useful for all the panel members to get acquainted with all the applications. The Research Council staff will assist the panel in preparing the panel review reports.

3.4 How to review applications in the Council's online services

Please use the [Research Council of Finland's online services](#) (link takes you to the online services via the Council's website). You can find the review instructions and offline versions of all our review forms under [Guides for reviewers](#) on our website. Both individual reviews and panel review reports are completed in the online services.

4. Expert fees

There will be a modest compensation for participation, EUR 460 (EUR 600 to the panel chair) per panel day (taxed as per your national taxation rules). This compensation also covers participation in a short pre-meeting. Furthermore, EUR 120 will be paid for each individual draft review.

To claim your fees, please enter your own personal banking details on the online services. The honorarium will be paid into your personal bank account. Please notice that IBAN is mandatory for bank accounts in Europe. Also fill in the BIC/SWIFT -code / clearing code / routing number.

Make sure that you have entered your personal details correctly in the online services to avoid any unnecessary delays in the payment. The payslip will be sent to your home address.
