

Application review form

Academy Project 2026

2026 winter call

Panel/Name of reviewer:

Application number:

Name of applicant:

Title of proposed project:

How to review Academy Project applications

This funding scheme is designed to promote the quality of research, scientific impact and impact beyond academia as well as scientific renewal and diversity. The focus of the review should be on the scientific quality and implementation of the research plan. The aim is to reach internationally as high a scientific standard as possible and to support scientific breakthroughs and top-tier international research collaboration. The funding is applied for to employ a research team, and it may be applied for by individual research teams or consortia composed of two or more research teams.

Provide both a written review and numerical ratings in section 1 (Quality of research) and section 2 (Implementation), and give an overall rating in section 4. Write evaluative comments rather than descriptive ones. Section 3 (Review panel's summary assessment) is written by the panel during the panel meeting.

Use a rating scale ranging from 6 (outstanding) to 1 (insufficient). The consistency between the numerical rating and the written comments is particularly important.

Rating scale	Description
6 (outstanding)	Demonstrates extremely high novelty and/or innovation; has potential to substantially advance science at global level; presents a high-gain plan that may include risks
5 (excellent)	Is very good in international comparison - contains no significant elements to be improved
4 (good)	Is in general sound but contains some elements that should be improved
3 (fair)	Is in general sound but contains important elements that should be improved
2 (poor)	Contains flaws and needs substantial modification or improvement
1 (insufficient)	Contains severe flaws that are intrinsic to the proposed project or the application

1 Quality of research

1.1 Scientific quality, novelty and innovativeness of research

Subrating (1-6)

Please review:

- scientific quality and significance of project's objectives and hypotheses
 - ambitiousness and state of the art of objectives, including possible novel concepts and approaches or development across disciplines
 - (if applicable) scientific added value of consortium for attainment of research objectives
 - impact of research within academia
 - potential for breakthroughs or exceptionally significant outcomes including possible high-risk, high-gain research
 - project's potential to generate new knowledge, new methods, new technology or new practices
- See [research plan](#).
 - A consortium application consists of two or more subprojects each with nominated PIs and separate budgets but a common research plan. The consortium implements a joint research plan together, with a view to achieving more extensive added value than through normal cooperation.

1.2 Additional comments on aspects of societal effects and impact of project, if relevant

(no numerical rating)

- Comments on societal effects and impact should not affect the scientific review/rating or ranking. Instead, they will be considered as an additional factor when the funding decisions are made.

2 Implementation

2.1 Feasibility of research plan, including aspects of responsible science

Subrating (1-6)

Please review:

- feasibility of project, taking into account extent to which proposed research may include high risks
- materials, research data and methods
- working arrangements and management of research tasks
- research environment including research infrastructures
- identified potential scientific or methodological problem areas and mitigation plan
- consideration of gender equality and nondiscrimination, research ethics, open access to research publications and data, data management, and sustainable development

- See **research plan**.
- See **brief data management plan** in the application form.

2.2 Expertise, human resources and collaborations, including aspects of responsible science

Subrating (1-6)

Please review:

- competence and scientific expertise of applicant (and in case of consortium: all applicants) in terms of project implementation
 - complementary expertise of team, who are directly working for/funded in the project, including appropriateness and sufficiency for proposed project
 - adequacy of human resources for project implementation, with attention to promoting equality and nondiscrimination within project
 - contribution of both national and international research collaborators, who are engaged with their own funding, and impact of their environment on project's potential success
 - significance of planned mobility for implementation of research plan and researcher training
- See **research plan**.
 - See **most relevant publications and other key outputs** in the application form.
 - See **CV(s)** of the applicant(s) in the application form.
 - See **list of publications**.
 - See **mobility plan** in the application form.
 - See possible **letter(s) of collaboration**.

3 Review panel's summary assessment of proposal

3.1 Main strengths and weaknesses of proposal and their justifications; possible other remarks

TO BE COMPLETED ONLY AT THE PANEL MEETING

Section 3 of the form is applicable only to the applications selected for discussion during the review panel meeting.

3.1.1 Main strengths and their justifications

(no numerical rating)

- Summary assessment of application including main strengths with justifications
 - Refer to the review criteria in sections 1 and 2.
 - To be completed only at the panel meeting.

Research Council of Finland

3.1.2 Main weaknesses and their justifications

(no numerical rating)

- Summary assessment of application including main weaknesses with justifications
 - Refer to the review criteria in sections 1 and 2.
 - To be completed only at the panel meeting.

3.1.3 Other remarks (if any):

- For example: possible contradictions in individual reviews, or other relevant remarks from the panel discussion (incl. societal effects and impact)
 - To be completed only at the panel meeting.

4 Overall rating

Rating (1-6)

- Please note that the final rating should not be a mathematical average of the subratings. For example, the application should not be penalised if it has a slight weakness in one evaluation item that is later strengthened in another item (e.g. lack of some expertise in a local team but compensated through international collaboration).

Ranking based on panel discussion (the ranking is made during the panel meeting)

Your application was ranked [ordinal number] of all [number] [Funding instrument name] applications reviewed in this panel. Only applications with a final rating of 5 or 6 were ranked.
