

THE ACADEMY OF FINLAND'S FUNDING TERMS AND CONDITIONS 2019–2020

Decision 28 May 2019

These funding terms and conditions of the Academy of Finland (hereafter the Academy) apply to funding calls implemented between 1 September 2019 and 31 August 2020 and to funding decisions based on these calls.

Contents

PART I APPLYING FOR FUNDING	5
1. SCOPE OF APPLICATION	5
1.1 Scope of application of these funding terms and conditions	5
1.2 Receiving and confirming receipt of funding decision, notifying application for advance payment	6
2. APPLYING COST MODELS IN THE ACADEMY OF FINLAND’S RESEARCH FUNDING	7
2.1 Funding percentage.....	7
2.2 Decisions in accordance with the additional cost model	7
3. BASIC FACILITIES FOR THE PROJECT.....	8
4. COSTS OF FOREIGN SCIENTISTS’ RESEARCH VISITS TO OR RESEARCH IN FINLAND	8
5. CONSIDERING PRINCIPLES OF SUSTAINABLE DEVELOPMENT	9
6. RESPONSIBLE SCIENCE	9
6.1 Research ethics	9
6.2 Publishing, data and material, and open science	9
6.2.1 Open access to publications.....	10
6.2.2 Open data and material.....	11
PART II USING FUNDING	11
7. RECEIVING AND CONFIRMING RECEIPT OF FUNDING DECISION, NOTIFYING APPLICATION FOR ADVANCE PAYMENT.....	11
8. DEVIATING FROM THE FUNDING PLAN.....	12
8.1 Applying for changes in annual instalments.....	12
8.2 Applying for changes in funding proportions of consortium subprojects	12
9. USE OF FUNDING	13
9.1 General principles.....	13
9.2 Eligible project costs	13
9.3 Self-financing	14
9.4 Costs of researcher mobility	14
9.5 Funding for international researcher mobility based on bilateral agreements	15
9.6 Travel costs.....	15
9.7 SRC matching funds for Horizon 2020	16
10. HIRING STAFF	16
10.1 Funding for research posts as Academy Professor and Academy Research Fellow	16
10.2 Funding for research post as Postdoctoral Researcher	18

10.3 Salary costs of the principal investigator.....	18
10.4 Funding for research post as clinical researcher.....	19
10.5 Teaching by hired staff.....	19
11. ACQUISITIONS WITH ACADEMY FUNDING.....	19
11.1 Managing fixed assets.....	20
12. CHANGES TO FUNDING DECISIONS.....	20
13. CONTROL, DISCONTINUATION AND CLAWBACK OF FUNDING.....	21
14. INTELLECTUAL PROPERTY RIGHTS.....	22
14.1 Cooperation with business companies.....	23
15. REPORTING.....	23
15.1 Scientific reporting.....	23
15.2 Auditor’s report.....	24
PART III PAYMENT OF FUNDS AND PROJECT ADMINISTRATION.....	24
16. PAYMENT OF FUNDS.....	24
16.1 Advance payments.....	24
16.2 Requests for payment.....	25
16.3 Submitting payment requests in the online services.....	26
16.4 Returning government transfer to the Academy of Finland’s bank account.....	26
17. COEFFICIENTS.....	26
17.1 Indirect employee costs.....	26
17.2 Paid absence.....	27
17.3 Effective working hours.....	27
17.4 Direct costs.....	27
17.5. Overheads percentage.....	27
18. ACQUISITION COSTS COVERED BY DISCRETIONARY GOVERNMENT TRANSFERS.....	28
19. PROVISIONS APPLICABLE TO ACADEMY FUNDING.....	28
APPENDIX 1: How to apply for changes to funding decisions.....	29
(1) Changing annual instalments in new funding decision.....	29
(2) Extending funding period.....	29
(3) Additional grant (i.e. compensation).....	30
(4) Changing sites of research.....	31
(5) Declining research grant in full.....	33
(6) Declining research grant midstream.....	33
(7) Changing principal investigators.....	34

(8) Changing decision conditions or purpose of use, substantially changing the research or action plan...	35
(9) Changing funding proportions of consortium subprojects.....	35
(10) Changing Academy Research Fellow funding decision.....	36
(11) Changing Academy Professor funding decision	38

PART I APPLYING FOR FUNDING

1. SCOPE OF APPLICATION

1.1 Scope of application of these funding terms and conditions

This document includes terms and conditions as well as guidelines for funding decisions made by the Academy of Finland. These funding terms and conditions of the Academy of Finland (hereafter the Academy) apply to funding calls implemented between 1 September 2019 and 31 August 2020 and to funding decisions based on these calls. As a rule, the contact person for a funding decision by the Academy is the person who has signed the decision notification. You can also contact the Academy via the Registrar's Office. NB! If any questions arise concerning the accuracy of the information presented in this translated version of the conditions and guidelines, please refer to the official Finnish version. The terms and conditions concern the following funding opportunities and granted funding:

- Academy Project funding and targeted Academy Project funding
- Academy Programme funding
- Funding for research post as Academy Professor
- Academy Professor funding for research costs
- Funding for research post as Academy Research Fellow
- Academy Research Fellow research costs
- Funding for NSF Graduate Fellows for research in Finland
- Funding for international researcher mobility (from and to Finland) based on bilateral agreements
- Funding for research post as clinical researcher
- Funding for strategic research
- Funding for research post as Postdoctoral Researcher
- Funding for research infrastructures
- Competitive funding to strengthen university research profiles

These terms and conditions as well as any special conditions mentioned in the Academy's funding decisions and the Finnish Act on Discretionary Government Transfers must be followed in the use, payment and control of funds granted by the Academy. Academy funding is granted for a fixed term. The funding conditions are the same irrespective of whether the funding involves a central government organisation or a recipient of discretionary government transfers.

These terms and conditions apply when the recipient of the funding is a site of research (recipient of government transfer) or a grant recipient. Academy research funding is granted to Finnish sites of research, unless there are special reasons for not doing so. The PI of the funded project must have a close connection with Finland to support the implementation of a multi-year project.

The Academy's funding terms and conditions for funding decisions apply to both the PI and the site of research (recipient of government transfer). The PI bears the primary responsibility for the implementation of the research and for adherence to the funding plan.

Academy funding cannot be used for economic activity, which is defined as all activity where goods or services are offered on an open market regardless of whether profits are pursued or generated. When an organisation is also engaged in economic activities, separate accounts must be kept of the funding and costs of and the revenue generated by such activities.

The Academy can fund research infrastructures that are used for non-economic activities. If, however, a research infrastructure is also used for economic activity, the activity may only be of an ancillary nature. Ancillary activities are directly associated with and essential to the research infrastructure, or closely affiliated with the infrastructure's non-economic activities. In economic activities, the annual capacity of ancillary activities must not exceed 20% of the infrastructure's annual total capacity. The Academy must be notified as soon as possible if the annual capacity exceeds 20%.

A 'research organisation' refers to an organisation (e.g. higher education institutes, research institutes, technology transfer organisations, innovation intermediaries, and research-oriented physical or virtual collaborative entities), irrespective of its legal status (organised under public or private law) or financing source, whose primary goal is to conduct independent basic research, industrial research or experimental development or to disseminate its results widely by means of education, publication or knowledge transfer. When such an entity is also engaged in economic activities, separate accounts must be kept of the funding and costs of and the revenue generated by such activities. The enterprises exercising a controlling interest in such an entity (as shareholders, members, etc.) may not enjoy any preferential access to the results generated by the entity.

Research infrastructures refer to a reserve of research instruments, equipment, data and services that support research and development at various stages of innovation, promote organised research, researcher training and teaching, and reinforce research and innovation capacity. Research infrastructures may be based at a single location (single-sited), scattered across several sites (distributed), or provided via a virtual platform (virtual). They can also form mutually complementary wholes and networks.

1.2 Receiving and confirming receipt of funding decision, notifying application for advance payment

Applicants will receive an email message of the funding decision. The email address is the applicants' username for the Academy of Finland's online services. In the online services, the applicant can view the funding decision as well as the terms and conditions related to the decision.

The site of research of the PI receives and administers the funding granted by the Academy. Before the funds can be paid, the PI and the site of research (first the PI, then the site of research) must confirm that they will accept the funding. This must be done via the Academy's online services within six weeks of the decision date, unless otherwise stated in the special conditions of the decision notification. By their confirmation, the PI and the site of research accept the content of the funding decision in full and commit themselves to following the conditions set for the use of the funds. **Any applications for changes in the annual instalments of the decision (see chapter 8) must be submitted by the PI before receipt of funding is confirmed.**

No confirmation of receipt is needed for international researcher mobility grants (from and to Finland) based on bilateral agreements.

Sites of research may notify the Academy of their intention to apply for advance payments on funding granted. The minimum amount for advances paid by the Academy is 10,000 euros. In the notification, the site of research must justify why the funded project needs an advance payment. For more information on advance payments, see section 16.1.

2. APPLYING COST MODELS IN THE ACADEMY OF FINLAND'S RESEARCH FUNDING

As a rule, the full cost model is applied in all drafting, issuing and executing of the Academy of Finland's funding decisions. Any exceptions to this principal rule are mentioned separately for each funding opportunity.

Universities and universities of applied sciences must consider the regulation issued by the Ministry of Education, Science and Culture (27 May 2016) on the calculation of full costs.

Academy research funding is in essence a form of co-funding in which the funds to finance the costs of a project primarily come from at least two sources. In the case of funding granted by the Strategic Research Council (SRC) and funding to strengthen university research profiles, the Academy's funding contribution comes to 100 per cent.

When Academy funding is applied for, universities, research institutes and other research organisations commit to the co-funded activity by contributing their percentage of the costs.

2.1 Funding percentage

Under the full cost model, the Academy of Finland's funding contribution normally covers a maximum of 70% of the total costs of a project.

The funding percentage is equally applicable to all project costs, that is, to both direct and indirect costs. Project overheads are indirect costs (see section 17.5). The Academy's funding percentage will be the same in each request for payment and for each year through the entire funding period. The Academy's funding percentage is mentioned in the decision notification (table for calculation grounds/funding for the project, last column under **Total**).

In the funding for strategic research and the funding to strengthen university research profiles, the Academy's funding covers 100% of the total costs of a project. In these funding opportunities, sites of research need not contribute with their own percentage of the funding.

2.2 Decisions in accordance with the additional cost model

The full cost model does not apply to the cost calculation in salaries for research posts as Academy Professor and Academy Research Fellow. In these cases, the Academy of Finland uses the 'additional

cost model' and an overheads percentage of 12.5%. However, if the research post holder has been granted funding for research costs associated with the post, that funding does come under the full cost model. Likewise, the full cost model does not apply to grants for international researcher mobility (from and to Finland) based on bilateral agreements nor to continuation and additional funding related to decisions made under the additional cost model.

Deviations from the full cost model are also possible in co-funded international calls in which the funding agencies have jointly decided on the principles for the funding and financial administration of projects.

3. BASIC FACILITIES FOR THE PROJECT

The application must include a commitment by the site of research (i.e. the applicant's host organisation that is committed to administering the received funding) which includes a commitment to secure the necessary basic facilities for the project and a notice of the overhead, indirect employee costs and coefficient for effective working hours for the site of research. If the funding is discretionary government transfer, the site of research must commit to act as the recipient of the transfer on behalf of the applicant and will accordingly assume all related obligations.

The Academy of Finland will fund a research project only if the site of research undertakes to provide the project with the necessary basic facilities. Though determined based on the nature of the research, they are usually the same as those available to other research staff at the institution: office and laboratory premises, equipment (incl. computer equipment) and telecommunications, telephone, mailing, copying and library services.

4. COSTS OF FOREIGN SCIENTISTS' RESEARCH VISITS TO OR RESEARCH IN FINLAND

As a rule, funding granted by the Academy of Finland cannot be used to award a grant to a foreign researcher from another EU country. There is one exception: the Academy's researcher mobility grant based on bilateral agreements. If a foreign EU-based researcher does research, they should be paid salary.

The recommended grant (incl. compensation for accommodation) paid for non-EU-based foreign scientists' short-term research visits to Finland is 80–186 euros/day (includes a personal grant of €39 and a maximum compensation for accommodation of €147).

Grants can be awarded to non-EU researchers for a maximum of one year's research spell in Finland. For visits longer than one month, the recommended grant sums (incl. compensation for accommodation) are:

- master's degree or equivalent level: €1,600–1,800/month
- PhD or equivalent level: €1,800–2,500/month
- professor: €2,500–4,100/month.

A particularly outstanding visiting professor may be awarded a larger grant than indicated above.

The grant sums take into account the grantee's obligation to take out pension, accident and life insurance.

5. CONSIDERING PRINCIPLES OF SUSTAINABLE DEVELOPMENT

The Academy of Finland is committed to the Society's Commitment to Sustainable Development for 2018–2021. One of the objectives of the commitment is to increase awareness of the principles of sustainable development and to highlight their significance in research funding and scientific research. Another objective is to make use of active communications to draw attention to how research can contribute to promoting sustainability.

We require that Academy-funded projects consider the principles of sustainable development when following good scientific practice. In their research plan, as a part of the societal impact description, researchers are encouraged to include an account of how the project will promote sustainable development. In the final reports, in turn, they should describe how the project and its results succeeded in this task. The Academy also considers the principles of sustainable development when planning themes for Academy Programmes and the contents of other thematic funding opportunities.

6. RESPONSIBLE SCIENCE

6.1 Research ethics

The Academy of Finland requires that the guidelines of the Finnish Advisory Board of Research Integrity (Responsible conduct of research and procedures for handling allegations of misconduct in Finland; see www.tenk.fi/en) be followed in all Academy-funded research. We also require that researchers follow ALLEA's (All European Academies) [European Code of Conduct for Research Integrity](#) when engaging in international collaboration.

Adherence to the principles of good scientific practice is primarily the responsibility of each individual researcher and research team, but the responsibility is also shared by the director of the research unit and the management of the organisations conducting research. Besides complying with good scientific practice, the research community and the individual researcher must also consider the legislation in force.

The site of research undertakes to submit to the Academy's Registrar's Office the final report of any investigations concerning violation of good scientific practice by the PI or a researcher of an Academy-funded project.

The Academy will not process a funding application if the applicant has been found guilty of research misconduct in the three years preceding the year of the call. If the Academy finds out about the misconduct during the funding period, whatever is left of the funding period will be added to the three-year limit. If the applicant appeals the decision on the misconduct, and the appeal is successful, the Academy will process the applicant's new applications following normal procedures.

6.2 Publishing, data and material, and open science

All results produced with funding from the Academy of Finland must be made public.

Scientific publications and research data and material produced with funding from the Academy of Finland must always indicate that the research has been conducted with funding from the Academy. The number of the Academy's funding decision must also be mentioned. If the publication or data are electronic, the grant number(s) must be included in the metadata.

We require that Academy-funded projects commit to open access publishing. We also urge projects to make their research data and methods freely available. The goal is to make research publications, data and material, metadata and methods widely available for reuse. The principles of open science must be pursued with due attention to research ethics and law.

Publications produced with funding from the Strategic Research Council (SRC) must always include the number of the funding decision and a mention of the fact that the research has been conducted with funding from the Strategic Research Council at the Academy of Finland.

6.2.1 Open access to publications

The Academy of Finland requires that Academy-funded researchers make sure that research results produced with Academy funding are made openly available, for example, by storing parallel copies of the scientific publications in open access repositories or suitable databases, or by publishing the results through scientifically high-quality open access publication channels. This requirement particularly concerns peer-reviewed scientific articles. We recommend that researchers publish articles following either green or gold open access.

Green open access means that researchers publish their articles in subscription-based scientific journals and deposit parallel copies in online open access repositories. The Academy does allow for an embargo period following the practices of international funders. The embargo is no more than six months, except in the humanities and social sciences where it is no more than twelve months¹.

Gold open access means that a publication is immediately provided in open access mode by the scientific publisher. The publisher often charges an open access fee (article processing charge). This fee may be included in the research costs of the project.

Hybrid open access refers to a combination of subscription-based and free-of-charge publishing. This means that the author pays a fee (article processing charge) determined by the publisher to make the article freely available. Otherwise the journal is only available to readers who have paid the subscription fee. In these cases, the publisher collects money from both the authors and the readers. Hybrid open access is only a temporary solution and part of the transition towards full open access publishing. Academy funding may also be used to cover costs of publishing using the hybrid model.

¹ European Commission background note on open access to publications and data in Horizon 2020.

Over the next few years, the Academy will closely monitor the development and costs of open access publishing. The policy will be revised where necessary to adapt to evolving ways of working and publishing.

The Academy is a part of cOAlition S, a consortium of research funders which promotes open access to publications. We promote open science in close collaboration with funders and other actors.

6.2.2 Open data and material

Research data and material produced with Academy funding in research projects and research infrastructure projects must be made freely available as soon as possible after the research results have been published. Sites of research must therefore provide researchers with the necessary guidance and ensure that they have access to suitable storage infrastructure.

Data and material may come in varying degrees of openness, ranging from fully open to strictly confidential. The publisher of the data and material must ensure that the publishing will not be in breach of the Finnish Act on the Openness of Government Activities, data protection law or the Finnish Copyright Act. When making data and material openly available, the parties involved must also consider licensing issues.

We recommend that principal investigators of Academy-funded research projects also store their research data and material and make them available through major national or international archives or storage services that are important in their own fields. If the research data and material cannot be made openly available, the metadata must be stored in a national or international data finder.

The costs associated with storing and sharing research data and material are regarded as overheads for the project's host organisation, but they may also be legitimately accepted as research costs to be covered with Academy research funding. (See section 9.2.)

More information on open access publishing, open data and material, and archives or storage services is available on our website under:

Funding > Apply for funding > A–Z index of application guidelines > Open science – open access publishing and open data

PART II USING FUNDING

7. RECEIVING AND CONFIRMING RECEIPT OF FUNDING DECISION, NOTIFYING APPLICATION FOR ADVANCE PAYMENT

Before Academy of Finland funds can be paid, the PI and the site of research must confirm that they will receive the funding (see section 1.2). The Academy of Finland's payment procedure is based on invoicing

and applies to all sites of research that receive Academy funding. The site of research is responsible for requesting advance payments and for submitting requests for payment. The financial administration must follow the principles of good governance. The Academy accepts requests for advances and requests for payment as e-invoices. The requests can also be submitted via the online services.

8. DEVIATING FROM THE FUNDING PLAN

In addition to the total amount of funding, the Academy of Finland's funding decision may also specify the annual instalments and types of expenditure for the project. If the funding granted by the Academy is less than what was applied for, it means that the Academy has scaled down both its own funding contribution and the contribution of the site of research proportionally.

The types of expenditure specified in the decision's cost estimate are indicative; deviation from them is allowed only if the funding will still be used for the purpose stated in the funding decision and the implementation of the proposed research plan. In the case of major deviations, applicants are advised to email the official at the Academy of Finland who signed the decision notification, the Academy division responsible for the project's administration or the Academy's Registrar's Office. The Academy will confirm receipt of such information by email.

8.1 Applying for changes in annual instalments

If the PI of a project cannot commit to the annual instalments specified in the Academy's funding decision, they must submit a proposal to the Academy on new instalments. The appeal is submitted via the Academy's online services under My applications > Decided > Make an appeal > Change cost estimate. The appeal must include justifications for the requested change and a new cost estimate for the project. The proposed change must not exceed the Academy's total funding granted for the project.

Cost estimate appeals must be submitted **within six weeks of the decision date**, unless otherwise stated in the special conditions of the decision. For more detailed instructions, please see Appendix 1. If the annual instalments deviate significantly from the decision's cost estimate during the funding period, the PI must notify this deviation in advance and without delay in the Academy's online services under My applications > Decided > Additional information. This also applies retroactively to previous funding decisions by the Academy.

It is not possible to apply to change the annual instalments for funding decisions concerning funding to strengthen university research profiles.

8.2 Applying for changes in funding proportions of consortium subprojects

In certain funding opportunities, (Academy Programme funding, funding for research infrastructures and funding programmes by the Strategic Research Council) it is possible to apply for changes in the funding plans of consortium subprojects while the consortium project is ongoing.

The proposed change cannot exceed the total funding amount granted by the Academy of Finland for the project, that is, the consortium's total funding must not change. For more detailed instructions, please see Appendix 1.

9. USE OF FUNDING

9.1 General principles

Research funding granted by the Academy of Finland may only be used for the purpose specified in the funding decision. Any conditions set in the funding decision by the Academy must be adhered to.

Academy funding is granted as a total sum that must not be exceeded. The funding can be used only for costs that have incurred during the funding period. If the Academy requires an auditor's report on the project, the auditing costs may be accepted as project costs, even if they arise after the funding period has ended. The PI and the site of research are responsible for seeing to that the funds are used in compliance with the funding decision, with these funding terms and conditions as well as with other regulations and provisions (see chapter 19).

If an Academy-funded research organisation or research infrastructure is also engaged in economic activities, separate accounts must be kept of the funding and costs of and the revenue generated by such activities. The Academy must be notified as soon as possible if the annual capacity of the economic (i.e. ancillary) activity exceeds 20%.

In the case of Academy funding for research infrastructures and strategic research, the funding can – on certain conditions – be transferred to be administered at a site of research other than the original one. The PI's site of research acts as the funding recipient. The funding can be transferred to sites that are mentioned in the original application, unless the Academy's decision says otherwise. By virtue of section 7 of the Finnish Act on Discretionary Government Transfers, the PI's site of research is obliged to conclude a contract for the use of the transfer, the control of the use and the terms with the other sites of research receiving Academy funding. The PI's site of research is required to assume full responsibility for the use of funding, even if funds have been transferred to be used at other sites.

9.2 Eligible project costs

Academy funding can be used to cover both direct costs (e.g. salaries) and indirect costs (e.g. rents for premises) of a research project. All costs are covered with the same funding percentage, as specified in the funding decision. Research projects include Academy Projects, Targeted Academy Projects, Academy Programmes, funding for strategic research, funding for research posts, and competitive funding to strengthen university research profiles. See below for guidelines concerning salary funding in research posts.

Research grants awarded by the Academy can be used within the limits of the research plan or action plan (in the case of funding to strengthen university research profiles) to cover the following costs:

- salaries, fees and indirect employee costs (see section 17.1)
- salaries and indirect employee costs of researchers returning to Finland
- overheads (see section 17.5)
- mobility by researchers working on the project (see section 4)
- foreign scientists' research visits to or research in Finland (see section 4)

- travels (see section 9.6)
- collaboration in Finland and abroad
- purchases of services
- auditing costs
- implementing the interaction plan (projects funded by the Strategic Research Council)
- preparation of international projects
- research collaboration meetings
- acquisition of individual instruments, software, etc. that are essential to the project; the acquisition must not be part of a larger research infrastructure
- publishing, especially publication fees for open access publishing using the golden or hybrid route

The costs associated with storing and sharing research data are regarded as overheads for the project's site of research, but they may also be legitimately accepted as costs to be covered with Academy research funding.

Value added tax is also paid out of funding granted by the Academy, provided that the VAT remains to be paid by the funding recipient and the recipient is not entitled to deduct VAT costs in its accounting. If the VAT does not remain a final cost for the site of research (recipient of government transfer), it cannot be included in the costs of an Academy-funded project. The funding recipient must not be overcompensated by the payment of costs that will not remain as its final costs.

9.3 Self-financing

Self-financing percentage refers to the organisation's own funding contribution to the total costs of a co-funded project (i.e. the contributions of all other funding bodies have been deducted from the total costs). Within the conditions for the use of funding, the organisation in question can finance its own share with, for instance, discretionary government transfers for overheads, returns from companies or business activity, donations or other external funds.

9.4 Costs of researcher mobility

The Academy's funding decisions (incl. funding for research posts) can include mobility allowances. This is mentioned in the decision under "Other costs". The recommended amounts are as follows:

- researchers: €1050 euros/month
- researchers with dependent children: €1500/month

The funding can also be used to cover costs of accompanying family members, provided that the mobility lasts at least six months and the researcher's funding allows for mobility.

The mobility allowance can be used to cover the extra costs of a researcher's work abroad. Since the allowance is paid following the practices of the site of research, the funding recipient must consult the site's personnel and financial administration. Indirect employee costs will be deducted from the mobility allowance if the site of research pays it as a taxable benefit.

If the site of research decides to pay the mobility allowance as a grant, it must first consult the tax administration concerning any tax consequences possibly arising from the payment of the grant. The Academy is not liable for any tax consequences arising thereof. Both the grant recipient and the awarding organisation are obliged to immediately notify the Farmers' Social Insurance Institution Mela (see www.mela.fi/en) of the grant. Grant recipients are also obliged to take out statutory insurance.

9.5 Funding for international researcher mobility based on bilateral agreements

The Academy of Finland's funding for mobility from and to Finland are based on the Academy's bilateral agreements. The grants can be used for work abroad, researcher training and work by foreign researchers in Finland.

The full cost model does not apply to funding for mobility from and to Finland granted by the Academy. Such grants can only be used for the purpose specified in the funding decision.

In mobility to Finland and DAAD (Deutscher Akademischer Austausch Dienst) co-funding, the funding is paid to the sites of research based on the request for payment submitted to the Academy of Finland.

The grant awarded for mobility from Finland includes a monthly grant paid to the researcher. The grant may also include funding for travel costs. The travel costs of accompanying family members may be included in the funding decision, provided that such costs have been applied for and the researcher and his or her family stay abroad for at least six months. Grants do not include funding for settling-in costs.

Payment of grants for mobility from Finland is requested with the Academy's payment request form, available on our website:

Funding > Use funding > Forms > Payment requests private persons

The signed request must be mailed to Academy's Registrar's Office one month before the first payment date. The Academy pays mobility grants into the recipient's Finnish bank account on the 15th of each month. The start date (the 15th day of the month) for the payment of the monthly instalments must be indicated in the request for payment, as must the recipient's personal identity code and Finnish bank account number (IBAN).

Mobility grants awarded by the Academy based on bilateral agreements are normally tax-exempt. Both the grant recipient and the awarding organisation are obliged to notify the Farmers' Social Insurance Institution Mela (see www.mela.fi) of the grant. Grant recipients are obliged to take out statutory insurance. In addition, they must check the visa requirements of their target country and apply for a visa, if necessary.

9.6 Travel costs

Travel costs related to the research plan are eligible costs in accordance with existing regulations by the Finnish Tax Administration:

Decision of the Tax Administration on tax-exempt allowances for travel expenses
Guidelines of the Tax Administration on allowances for travel expenses in taxation

The Academy accepts the travel costs in accordance with the rules and administrative regulations concerning the funding recipient in cases where there are regulations on allowances for travel expenses that deviate from the Tax Administration's decisions and guidelines.

The maximum eligible cost amount must correspond to what is the normal level at the site of research.

9.7 SRC matching funds for Horizon 2020

The Strategic Research Council (SRC) at the Academy of Finland grants national matching funds to sites of research based on projects that have received funding under the Societal Challenges priority of Horizon 2020, the EU the Framework Programme for Research and Innovation. SRC matching funds can be applied for to compensate for funding shortfalls. Here, shortfall refers to the difference between the overheads percentage calculated using the Finnish full cost model and the indirect costs reimbursement calculated using the Horizon 2020 model. The matching funds are granted according to a reimbursement rate decided by the SRC. The minimum amount to be applied for is 10,000 euros. The funding is allocated to the site of research – not the project – to cover indirect costs (overheads). The aim of the funding is to improve the opportunities of research organisations to apply for international research funding. To help the SRC monitor this aim, the final reports of the projects should describe how the funding has promoted international collaboration.

The funding cannot be used for economic activity (see section 1.1). The funding is subject to an audit obligation. The recipient of matching funds must be prepared to, if necessary, show that the funds will not be allocated to any part of indirect costs funded by the EU Commission.

10. HIRING STAFF

Staff hired with Academy of Finland research grants must primarily be in an employment relationship to their site of research. We recommend that they be hired for a period of employment no shorter than the funding period, unless a shorter contract is necessary for special reasons dictated by the implementation of the research plan or action plan (in the case of funding to strengthen university research profiles). Short-term research, studies or other assignments may also be carried out in the form of outsourced services. We also recommend that sites of research enter the reason for a shorter contract in the employment contract.

The collective agreements in force at the site of research and other regulations concerning the employment relationship conditions must be observed in the hiring and other employment relationship conditions of any staff hired with Academy funding.

10.1 Funding for research posts as Academy Professor and Academy Research Fellow

When the Academy of Finland grants funding for a research post as Academy Professor or Academy Research Fellow the site of research must use the grant to fill the post in question. The site of research must hire the Academy Professor or Academy Research Fellow at least for the funding period.

The cost calculation of the salaries follows the additional cost model. In decisions following the additional cost model, the overheads percentage, calculated on top of other costs, is 14.29%, in which case the decisions include an overheads percentage of 12.5%.

The funding decisions include indirect employee costs to the tune of 28%. The Academy will not be liable for any expenditure specific to the employer. The employer must, however, see to that the salary does not fall behind the general salary development at the site of research.

The research posts as Academy Professor and Academy Research Fellow are intended only for full-time research work and related tasks. In addition, an Academy Professor or Academy Research Fellow cannot be paid salary from another Academy-funded research project. The duties of an Academy Professor or an Academy Research Fellow include teaching in their own field of research. However, any other tasks not directly related to the researcher's own research must not impede the actual research work. The duties include (without separate compensation) supervision of thesis and dissertation writers and teaching associated with the research, covering 5% of annual working hours. In all, no more than 10% of the annual working hours may be spent on teaching and other work not immediately associated with the researcher's own research.

The Academy Professor's or Academy Research Fellow's site of research is an organisation based in Finland through which the funding is channelled and paid. During the funding period, the Academy Professor or Academy Research Fellow may work abroad for periods of varying durations, for example at foreign universities.

The salary of an Academy Professor may also be co-funded. In such cases, for instance, the applicant has indicated in the original application how large a proportion of their salary will be applied for from the Academy. The situation may also change during the funding period. Of the funding granted by the Academy, 0–100% may be used for the Academy Professor's salary. Read more in Appendix 1 (11).

The salary of an Academy Research Fellow may also be co-funded, where appropriate in terms of supporting the researchers career advancement. In such cases, the site of research must use at least 70% of the Academy's funding to cover the salary. For those who have received funding from the European Research Council (ERC) the corresponding contribution is 50 per cent. The rest of the salary may come from other sources. This requires that the externally funded salary part has been allocated to research tasks or other tasks in support of the researcher's career, such as tasks that are part of the university's tenure-track system². The Academy's funding that is freed as a result of this co-funding can be used for the project's other research costs, which are justified separately.

Academy Research Fellows must submit an appeal in the Academy's online services, if they intend to claim salary from other funding sources. They must briefly describe the funding source and state the salary amount from that source. Read more in Appendix 1 (10). If they are eligible, the Academy will decide on the change, after which the site of research of the Academy Research Fellow (as stated in the funding decision) can send a payment request to the Academy in accordance with the new salary (see Chapter 16).

² A career system based on a review process, in which the university commits to making a researcher's post permanent when they reach a certain level.

If a person who has been granted Academy Research Fellow funding takes family leave, they must immediately notify the Academy, either the presenting official directly or via the online services under My applications > Decided > Additional information. If an Academy Research Fellow applies for an extension to the funding period based on maternity, paternity, family or childcare leave, they must submit the application via the Academy's online services under My applications > Decided > Make an appeal. Read more in Appendix 1 (2).

If a person who has been granted a research post as Academy Research Fellow will not continue in the post, they must immediately notify the Academy and give up the funding by submitting an appeal in the Academy's online services. The application to change the funding decision is submitted by the PI in the Academy's online services under My applications > Decided > Make an appeal. Read more in Appendix 1.

10.2 Funding for research post as Postdoctoral Researcher

Postdoctoral Researchers conduct full-time research according to their research plan. In addition, the Academy recommends that they provide supervision of thesis and dissertation writers and teaching associated with their own specific field.

The funding granted for a Postdoctoral Researcher post is intended for the researcher's salary for 36 months. The salary costs are determined in accordance with the pay system of the site of research. During the funding period, Postdoctoral Researchers will be in an employment relationship to their site of research. The Postdoctoral Researcher's site of research is an organisation based in Finland through which the funding is channelled and paid. During the funding period, the Postdoctoral Researcher may work abroad for periods of varying durations, for example at foreign universities.

Postdoctoral Researchers may additionally be granted funding for personal costs arising from research and mobility (see section 4). The funding cannot be used for other people's salaries or fees. In addition, a Postdoctoral Researcher funded by the Academy of Finland cannot be paid salary from another Academy-funded research project.

If a person who has been granted Postdoctoral Researcher funding takes family leave, they must immediately notify the Academy, either the presenting official or via the online services under My applications > Decided > Additional information. If a Postdoctoral Researcher applies for an extension to the funding period based on maternity, paternity, family or childcare leave, they must submit the applications via the Academy's online services under My applications > Decided > Make an appeal. Read more in Appendix 1.

If a person who has been granted Postdoctoral Researcher funding cannot continue in the post (e.g. because of a transfer to another task), they must immediately notify the Academy and give up the funding by submitting an appeal. The application to change the funding decision is submitted by the PI in the Academy's online services under My applications > Decided > Make an appeal. Read more in Appendix 1.

10.3 Salary costs of the principal investigator

The Academy of Finland's researcher-driven and thematic funding is primarily intended towards the salaries of researchers who work full-time on the project and for other project costs.

As a rule, funding is not granted for the salary of the research project PI.

However, the Academy may grant funding for the PI's salary in an Academy Project or in a project within the Centre Of Excellence or thematic funding for no more than a year for well-justified reasons (e.g. work abroad, return to Finland or transfer to another research organisation or a company in Finland).

The salary funding is intended to support the implementation of the Academy Project, which is specified in the special conditions in the decision notification. Under the full cost model, however, the salary costs of a principal investigator (PI) can be incorporated into the project costs to be funded. The funding for the PI's salary is granted for project management purposes. The PI's salary costs must be mentioned in the cost estimate and the research plan included in the funding application. Unless otherwise stated in the funding decision, the PI's salary costs can be paid to an amount equivalent to about 1.5 months a year of effective working hours in four-year research projects.

Funding awarded for strategic research can be used to cover the salary of consortium PIs and coordinator for the duration of the funding period. However, the salary funding must not overlap with salary paid from other funding by the Academy of Finland.

10.4 Funding for research post as clinical researcher

A clinical researcher is a medical doctor with a doctoral degree working in clinical practice or some other researcher with a doctoral degree engaged in clinical practice. The Academy of Finland's funding for clinical researchers is not intended for full-time university researchers. The funding is granted towards the post's salary costs to support **part-time research** (20–50% of working hours) by clinical researchers. The researcher and the site of research must agree the salary in accordance with the pay system at the site of research. They must also agree the working-time arrangements in advance, particularly if the research and the clinical work will be conducted at different sites.

In addition to salary costs, the Academy may also provide funding for research costs. The Academy's contribution to funding for a project promoting a clinical research career comes to no more than 70% of the total project costs.

10.5 Teaching by hired staff

The Academy of Finland recommends that Academy-funded researchers with a doctoral degree (incl. Academy-funded Postdoctoral Researchers) provide teaching or supervision of thesis and dissertation writers to the equivalent of 5% of their annual working hours (as specified in the collective agreement), without separate remuneration. However, no more than 10% of the annual working hours should be spent on teaching and other work not immediately associated with the researcher's own research.

If Academy-funded doctoral candidates provide teaching, we recommend that this teaching be associated with their own research and equivalent to no more than 5% of their annual working hours. Teaching must not delay the completion of a doctoral dissertation.

11. ACQUISITIONS WITH ACADEMY FUNDING

The funding recipient is liable to clarify whether the Finnish Act on Public Procurement and Concession Contracts is applied to acquisitions made by the Academy-funded research project. The PI of the project is also liable to see to that contracts are put out to tender in compliance with the practices stipulated in the Act.

11.1 Managing fixed assets

Any supplies, equipment and literature acquired with Academy funding will remain in the ownership and possession of the site of research. The parties can agree in writing on other procedures in the case of research infrastructures. The Academy must be notified of such agreements at the application stage. In multi-site joint projects, the parties must conclude a written agreement on the use, ownership and location of the research infrastructure, even for the time after the funding period.

If the funding decision covers acquisition of equipment, the funds can be treated as an investment aid. Investment aid can be granted for acquisition of either tangible or intangible assets.

If the funding is granted for acquisition of assets or for basic upgrades, the assets must not be used permanently for other purposes than for those defined in the decision on discretionary government transfers. Investment aid awarded by the Academy cannot be used to finance leasing agreements. Nor can the ownership or possession right of any assets be handed over to anyone else during the time they are used, as specified in the decision on discretionary transfers.

12. CHANGES TO FUNDING DECISIONS

Any significant changes in the content of a positive funding decisions by the Academy of Finland or in issues relating to the use of funds require prior approval by the Academy. If necessary, the Academy will change the funding decision based on the appeal.

The application to change the funding decision is submitted by the PI in the Academy's online services under My applications > Decided > Make an appeal. The appeal must include sufficient justifications and all information needed to handle the case. All necessary documents must be appended to the appeal. **See the detailed instructions in Appendix 1.**

Changes that require approval by the Academy include the following:

- 1) changing annual instalments in a new funding decision (see section 8.1)
- 2) extending funding period
- 3) additional grant (i.e. compensation, decision according to additional cost model)
- 4) changing sites of research
- 5) declining research grant in full (when funds have not been used)

- 6) declining research grant in the middle of a funding period (when some funds have been used)
- 7) changing principal investigators
- 8) changing decision conditions or purpose of use, substantially changing the research plan
- 9) changing funding proportions of consortium subprojects (see section 8.2)
- 10) changing an Academy Research Fellow funding decision into a co-funded decision (see section 10.1)
- 11) changing an Academy Professor funding decision into a co-funded decision (see section 10.1)

13. CONTROL, DISCONTINUATION AND CLAWBACK OF FUNDING

The Academy of Finland has the right to monitor and control the use of funds it has granted. The Academy also has the right to carry out any inspections of the finances and operations of the funding recipient that may be necessary for the control of the use of funds. Likewise, we have the right to inspect the implementation of the research, the accounting and the observance of the conditions set in the funding decision.

The site of research and the PI of the research project are obliged to submit to the inspector any necessary accounts and other documents and data and to assist in the inspection. Both the site of research and the PI must on request also submit information on the research and on the use of funds.

The PI and the site of research must without delay notify the Academy of any changes affecting the use of funds, such as other funding or income received for the implementation of the research plan. If this other funding or income exceeds the amount presented in the cost estimate of the application submitted to the Academy, we may require the site of research to return the proportion of Academy funding equivalent to the amount exceeding the cost estimate.

If the Academy's funding for a project covers 100% of the costs and the project receives income, for example from intellectual property rights, the project has to return the proportion exceeding that 100% to the Academy. Alternatively, it can also be deducted from the eligible costs.

The Academy may interrupt or order the payment of funds to be terminated, or recover the funds in full or partly, if there is justified reason to suspect that the PI or the site of research has done any of the following:

- used the funds for some other purpose than that for which they were granted
- presented erroneous or misleading information regarding a fact that may have affected the granting, amount or conditions of funding
- otherwise violated the regulations on the use of funds or the conditions set in the funding decision.

- In addition, funding granted by the Strategic Research Council may be terminated if the project in question fails to achieve the objectives set for it.

The recipient of discretionary government transfers must without delay repay into the Academy's bank account (see below) any funds or any portion of funds received erroneously, in excess or evidently without grounds.

OP Corporate Bank plc

IBAN: FI22 5000 0121 5007 70

BIC: OKOYFIHH

SWIFT: OP CORPORATE BANK PLC HELSINKI FINLAND

The Academy's decision number must be indicated in the repayment. The funds need not be returned if the sum is less than 100 euros. Provisions on the repayment and clawback of discretionary government transfers have been laid down in section 5 of the Finnish Act on Discretionary Government Transfers.

13.1 Interest on transfers to be returned and recovered

In accordance with Section 24 of the Act on Discretionary Government Transfers, the recipient of discretionary government transfers must pay annual interest as from the due date according to the Finnish Interest Act Section 3, paragraph 2, increased by three percentage points, on the amount to be returned or recovered. If the transfer to be recovered has not been repaid by the date set by the Academy, an annual interest must be paid on it according to section 4 of the Act. For the annual reference rate and interest for late payments, see the Bank of Finland's website at www.suomenpankki.fi.

14. INTELLECTUAL PROPERTY RIGHTS

Intellectual property rights (IPR) include copyright, patent rights, rights to a trademark, utility model rights, design copyright, rights to a commercial name, protection of integrated circuits and layout designs (topographies) and plant variety rights. IPRs are structured as exclusive rights analogous to the right of ownership. They provide protection for creative work (e.g. copyright and patent rights) or commercial marks (e.g. rights in a trademark and rights to a commercial name).

All project partners in a project funded by the Academy of Finland must agree on the rights of ownership and use concerning the project's research results. The agreement should be made in writing and as soon as possible after the funding decision has been issued. At the launch of the project, the partners should also agree on the rights of ownership and use of the materials and data to be used by the project. If the project involves cooperation with business companies, see section 14.1.

At sites of research in which the Finnish Act on the Right in Inventions made at Higher Education Institutions apply, Academy-funded research is defined as commissioned research as referred to in the Act. In these cases, the higher education institution has the primary right to inventions produced by the research. Other sites of research follow the Finnish Act on the Right in Employee Inventions.

14.1 Cooperation with business companies

If an Academy-funded project involves cooperation with business companies, one of the following conditions must be fulfilled:

- Results that do not give rise to IPR may be widely disseminated and any IPRs resulting from the activities of research organisations or research infrastructures are fully allocated to the entities concerned.
- Any IPRs resulting from the project as well as related access rights are allocated to the different collaboration partners in a manner that adequately reflects their work packages, contributions and respective interests.
- The research organisations or research infrastructures receive a compensation equivalent to the market price for the IPRs that result from their activities and that are transferred to the participating companies. The absolute amount of the value of any contribution, both financial and nonfinancial, of the participating companies to the costs of the research organisations or research infrastructures' activities that resulted in the IPRs concerned, may be deducted from that compensation.

Where an Academy-funded project involves cooperation with business companies, the terms and conditions of the project, in particular as regards contributions to its costs, the sharing of risks and outcomes, the dissemination of results, and access to and allocation of IPRs, must be concluded in writing before the start of the project.

15. REPORTING

It is a condition of Academy of Finland funding that reports be submitted to the Academy on outcomes from the funding. The scientific reports are submitted by project PI and the financial reports by the site of research (recipient of government transfer). The use of funds is monitored via the Academy's electronic systems. The two sets of data are combined to allow for comparisons between the use of funds and the results produced with those funds. The Academy has separate guidelines for reporting on funding by the Strategic Research Council and funding to strengthen university research profiles.

15.1 Scientific reporting

The PI must submit a scientific research report to the Academy no later than 1 June in the year following the end of the project's funding period. If an application is submitted for Academy research funding before funding for an ongoing project has ended, or after the funding has ended, or if the application is for a project on which the final report has not yet been submitted, applicants shall submit a progress report on each unreported decision. The progress reports are appended to the application. A progress report does not substitute the research report. Read more on our website, [Funding > Report on your project](#). Some funding schemes have their own specific guidelines for reporting. As a rule, scientific reports are public documents.

The consortium PI must submit the scientific report on behalf of the whole consortium after all subprojects have ended their funding periods.

15.2 Auditor's report

If the total Academy-granted funding (individual decision or consortium in total) indicated in the decision on *Academy Programme funding* exceeds 1,000,000 euros, the PI must submit to the Academy an auditor's report on the use of the research funds within the project. In *funding for research infrastructures*, the site of research and the PI together submit to the Academy an auditor's report on the use of the research funds within the project.

All funding decisions on *SRC matching funds for Horizon 2020*, *funding by the Strategic Research Council* and *funding to strengthen university research profiles* come under an audit obligation, regardless of the total amount of funding granted.

The auditor's report must be submitted to the Academy's Registrar's Office within three months of the end of the funding period. The cost of the auditing must be included in the last request for payment.

We may also request the report separately, if necessary. In addition, we may commission a sample-based project audit in accordance with our own annual audit plan.

PART III PAYMENT OF FUNDS AND PROJECT ADMINISTRATION

16. PAYMENT OF FUNDS

Before Academy of Finland funds can be paid, the PI and the site of research must confirm that they will receive the funding (see section 7). The Academy of Finland's payment procedure is based on invoicing and applies to all sites of research that receive Academy funding. The site of research is responsible for requesting advance payments and for submitting requests for payment. The financial administration must follow the principles of good governance. The Academy accepts requests for advances and requests for payment as e-invoices. The requests can also be submitted via the online services.

16.1 Advance payments

In accordance with Section 12 of the Finnish Act on Discretionary Government Transfers, an advance may be paid if this is justified by the use of the transfer and expedient with regard to the supervision of its use. Advance payments are justified in cases where the start-up or implementation of the project or activity in question, according to the schedule and scope referred to in the decision, requires that the recipient receives funding from a state aid authority.

Finnish universities and universities of applied sciences can request advances from the Academy of Finland. The requests must be submitted in writing and include project-specific justifications. The Academy does not pay advances to business companies. The one-off advance accounts for 10% of the

Academy's funding contribution. The minimum amount for advances paid by the Academy is 10,000 euros. Advances are not paid on mobility grants, research infrastructure funding and funding to strengthen university research profiles. Here, the Academy takes into account the compliance audit report on central government transfers to universities (Yliopistojen valtionrahoitus (10/2018)) published by the National Audit Office of Finland, and its observations on universities' liquidity.

Advances can be applied for on reasonable grounds and they are always paid in the year when the project starts. For projects that have started at the beginning of the year, advances for the period 1 January–31 December can be applied for no later than 20 February. For projects that have started in the middle of the year, advances can be applied for no later than 20 November. When applying for advance payments in the middle of the year, the start dates for the payment and the funding period must be the same. For example, if the project starts on 1 April, the request for advance payment must be for the period from 1 April to 31 December.

The advances for projects nearing completion must be returned to the Academy before the last request for payment. This is done by delivering the advance refund invoice to the Academy or by entering the paid advance as income for the project in the accounting report. We recommend that advances be settled in the accounting report when the project ends. The period of the refund must be the same as the period of the original request for advance payment. In the online services, select the advance refund invoice as the invoice type.

16.2 Requests for payment

Research projects submit payment requests to the Academy of Finland in four-month periods: January–April, May–August and September–December. The requests are submitted as e-invoices or via the online services no later than 20 May, 20 September and 20 January (or the next workday), respectively. The Academy's funding percentage will be the same in each request for payment and for each year through the entire funding period.

The coefficient for indirect employee costs and the overheads percentage approved in the funding decision are applied by the site of research for the duration of the funding period. An overheads percentage of 12.5% is applied to funding decisions made under the additional cost model.

The Academy requests the total outturn data from the start of projects funded under the full cost model and the outturn data for the period in question for each type of expenditure. The corresponding figures must also be given on the Academy's funding contribution. The percentage indicating the Academy's funding contribution in the decision is used as a calculation ground for the Academy's funding contribution. Reporting on hours worked forms part of the request for payment.

The basis for the reporting done in connection with payment requests is derived from work time monitoring and project accounting based on business accounting. In addition, the calculated overheads and indirect employee costs to be entered for the projects are derived from the cost calculation of the organisation in question. The site of research (recipient of the government transfer) will commit to annually submitting to the Academy's Registrar's Office separate reports on the calculated cost items based on the site's financial statements. The reports must include details on the percentages for indirect employee costs and overheads as well as on the coefficient for effective working hours.

If the funding recipient is unable to reliably calculate or otherwise provide a coefficient derived from accounting, the Academy can accept a coefficient for indirect employee costs that is a maximum of 50% of the salaries for the project's effective working hours.

If the funding recipient is unable to reliably calculate or otherwise provide a coefficient derived from accounting, the Academy can accept an overheads percentage that is a maximum of 20% of the salaries and indirect employee costs for the project's effective working hours.

16.3 Submitting payment requests in the online services

The guidelines in this section are intended for Finnish organisations. Submitting payment requests as e-invoices from the invoicing system of the site of research is a viable method only for mass submissions for organisations with, for example, more than ten Academy-funded projects.

The Academy's online services can also be used to draft a single e-invoice with an accounting report and a specification of full-time equivalents. This method is best suited to organisations with 1–5 Academy-funded projects, for instance. Log in to the online services on our website in Funding > How to apply > Online services (log in and go to Payments). The Registrar's Office can grant invoicing rights to sites of research upon request. We recommend that sites of research that have not previously received Academy funding contact the Finance Officer at the Academy's Division of Financial Services for more information.

16.4 Returning government transfer to the Academy of Finland's bank account

The recipient of discretionary government transfers must without delay repay into the Academy's bank account (see below) any funds or any portion of funds received erroneously, in excess or evidently without grounds.

OP Corporate Bank plc

IBAN: FI22 5000 0121 5007 70

BIC: OKOYFIHH

SWIFT: OP CORPORATE BANK PLC HELSINKI FINLAND

17. COEFFICIENTS

17.1 Indirect employee costs

Indirect employee costs are allocated to a project with a dedicated coefficient. As a rule, the coefficient is a percentage of the direct salaries allocated to the project. Costs that are covered with this coefficient include at least the following:

- salaries arising from paid absences
- holiday bonuses
- social security contributions
- pension contributions
- accident and unemployment contributions
- other similar employer contributions and returns on these.

The coefficient for indirect employee costs may also cover other personnel costs (e.g. occupational healthcare), if they have not been included in the overheads.

17.2 Paid absence

A paid absence covers all salary costs that result from statutory leaves of absence or other absences. This includes annual leave, family leave, sick leave, study leave, leave for trade unionism, occupational safety measures and cooperation procedures, as well as other paid leaves in accordance with the collective agreements and labour law.

17.3 Effective working hours

The term ‘effective working hours’ refers to the number of hours worked allocated to a specific cost item. The effective working hours do not include paid absences such as annual leave, sick leave, maternity and paternity leave, child-care leave or other indirect working hours. The proportion of a person’s salary corresponding to that person’s effective working hours on a project is eligible as a direct project cost. In the Academy’s budget model, the coefficient for effective working hours is 1.0, whereby the hours worked are budgeted only as months corresponding to effective working hours.

17.4 Direct costs

Typically, direct costs include direct salaries and the project’s costs regarding special equipment and special premises, travel expenses and other relevant research costs (that can be directly allocated), e.g. purchased chemicals or services.

17.5. Overheads percentage

The term ‘overheads’ refers to project costs that are not allocated to a project directly but indirectly, using specific allocation grounds of the site of research in line with the matching principle. The division of project costs into direct and indirect costs must follow the principles normally applied by the site of research.

The overheads are allocated to the project with a dedicated coefficient. As a rule, the coefficient is a percentage of the total sum of indirect employee costs and salaries for effective working hours within the project.

Costs that are covered with the coefficient for overheads include costs arising from administrative services, eligible depreciations from machines and equipment, and costs for premises (if not treated as direct costs according to the organisation’s general calculation principles).

18. ACQUISITION COSTS COVERED BY DISCRETIONARY GOVERNMENT TRANSFERS

The Academy requires that the general guidelines issued by the Finnish Accounting Board be applied to depreciations. The Board's general guidelines (16 Oct 2007) on depreciations according to plan provide advice on how a book entry on investment transfers is made. According to section 2.5 of the guidelines, an investment transfer received for acquisition of fixed assets is entered in the form of an expense transfer as a deduction of the acquisition cost. In the depreciation calculation, the depreciation base consists of the amount of the acquisition cost deducted with the transfer received. The whole acquisition cost of the fixed assets in question and the amount covered by the investment transfer are entered in the notes to the balance sheet's passive side and following the materiality principle.

19. PROVISIONS APPLICABLE TO ACADEMY FUNDING

The use, payment and supervision of Academy of Finland research grants are governed, among others, by the following provisions:

- Act on Discretionary Government Transfers
- State Budget Act and Decree
- Act on Public Procurement and Concession Contracts
- State Budget and the regulations regarding its application
- other general provisions and regulations regarding the use of state funds.

Sites of research must also follow their internal regulations, provisions and instructions, if these are not in contradiction with the conditions issued by the Academy.

APPENDIX 1: How to apply for changes to funding decisions

(1) Changing annual instalments in new funding decision

Description of the change	You can apply to change the annual instalments if the PI cannot commit to the instalments specified in the funding decision. The change must be significant.
Guidelines for the online services	1) Justify the proposed change in the free-text field. 2) Fill in the new cost estimate on the page New cost estimate.
Appendices required	No appendices required
In which types of funding is this change possible?	You can apply for this change in any decisions that have been made according to the full cost model as well as in mobility grants. However, annual instalments cannot be changed in the case of funding to strengthen university research profiles.
When do I apply?	Apply before confirming receipt of funding and within six weeks of the funding decision (any exceptions are mentioned in the decision notification).
After the decision on the change, do I need an electronic approval by the site of research?	Yes
NB!	The proposed change must not exceed the Academy's total funding granted for the project. The types of expenditure specified in the decision's cost estimate are indicative; deviation from them is allowed only if it supports the implementation of the proposed research plan. In the case of major deviations, please contact the presenting official. If necessary, we may consult the site of research or other parties before making the decision. The procedure for processing appeals may differ from the one presented here, if so required by the Finnish Administrative Procedure Act or any other legislation.
The application for the change is submitted by the project PI in the Academy's online services. In exceptional cases, the application can also be submitted by the site of research or some other party as referred to in the Administrative Procedure Act.	

(2) Extending funding period

Description of the change	The funding period may be extended on the basis of a researcher's maternity, paternity, parental or childcare leave, or military or nonmilitary service. It may also be extended for other special reasons, such as long-term illness.
Guidelines for the online services	1) Justify the proposed change in the free-text field. 2) Fill in the new end date for the funding period on the page New cost estimate. Remember to update the costs according to the new funding period. The proposed change must not exceed the Academy's total funding or contribution for the project.

Appendices required	<p>1) Decision on release from work</p> <p>Append to the application a copy of the employer's decision on release from work or some other employer certificate of the absence. The document must indicate the start and end dates of the absence.</p>
In which types of funding is this change possible?	You can apply for this change in all funding decisions (unless restricted by the special conditions of the decision). However, the funding period cannot be extended in the case of funding to strengthen university research profiles.
When do I apply?	Apply no later than two months before the end of the funding period.
After the decision on the change, do I need an electronic approval by the site of research?	No
NB!	<p>This change requires that no substitute has been hired for the researcher and that the researcher will return to work on the same project, under the same funding decision.</p> <p>The maximum extension on the basis of childcare leave (also partial childcare leave) is one year per child.</p> <p>Extensions to the funding periods of consortium subprojects may affect the consortium's reporting schedule.</p> <p>The funding period cannot be extended on the grounds that granted money has not been used.</p> <p>If necessary, we may consult the site of research or other parties before making the decision. The procedure for processing appeals may differ from the one presented here, if so required by the Finnish Administrative Procedure Act or any other legislation.</p>
<p>The application for the change is submitted by the project PI in the Academy's online services. In exceptional cases, the application can also be submitted by the site of research or some other party as referred to in the Administrative Procedure Act.</p>	

(3) Additional grant (i.e. compensation)

Description of the change	A project may be granted additional funding on the basis of a researcher's maternity leave or long-term illness. The additional funding is intended to be used to hire a substitute for the researcher.
Guidelines for the online services	<p>1) Justify the proposed change in the free-text field.</p> <p>2) Fill in the application for the additional grant on the Cost estimate tab.</p> <p>The funding period may start no sooner than on the date of the appeal. The funding period will end by 31 December in the year of the decision on the change.</p>
Appendices required	<p>1) Salary certificate</p>

	Append to the application a copy of the employer's salary certificate, showing the additional costs for the project incurred as a result of maternity leave or long-term illness.
In which types of funding is this change possible?	You can apply for this change in any funding opportunities that follow the additional cost model (e.g. funding for research post as Academy Professor, funding for research post as Academy Research Fellow).
When do I apply?	Apply no later than two months before the end of the funding period.
After the decision on the change, do I need an electronic approval by the site of research?	Yes
NB!	<p>If you are applying for an extension to the funding period of a research post, you must do so with a separate application before applying for additional grants.</p> <p>If necessary, we may consult the site of research or other parties before making the decision. The procedure for processing appeals may differ from the one presented here, if so required by the Finnish Administrative Procedure Act or any other legislation.</p>
The application for the change is submitted by the project PI in the Academy's online services. In exceptional cases, the application can also be submitted by the site of research or some other party as referred to in the Administrative Procedure Act.	

(4) Changing sites of research

Description of the change	The site of research may be changed if the PI transfers to another site in the middle of the funding period.
Guidelines for the online services	<ol style="list-style-type: none"> 1) Indicate whether project funding has been used at the original site of research. (Yes/No) 2) Justify the proposed change in the free-text field. 3) Fill in the costs incurred at the original site of research on the tab Realised costs. Also give an estimate of the costs to be invoiced for the last payment period. 4) On the tab New cost estimate, fill in the cost estimate for the funding to be transferred to the new site of research. <p>Use the button in the top corner of the form to copy the remaining costs. The total sum of the realised costs and the new cost estimate must not exceed the Academy's funding amount mentioned in the original decision. The sum remaining in the counter must be 0, otherwise the application cannot be submitted.</p> <p>The percentages for overheads and indirect employee costs may be updated according to the new site of research. If the percentages at the new site of</p>

	research are lower than in the decision, and they have not been altered, the site of research still has to submit the payment requests to the Academy according to the lower percentages based on the accounting. The PI must check with the new site that the funding is enough to carry out the research plan there.
Appendices required	<p>1) Consent by original site of research Append to the application a free-form letter with the original site's consent to the change.</p> <p>2) Commitment by new site of research Also append a free-form letter where the new site commits itself to overseeing and funding the project and to following the Academy's conditions for the use of funds.</p>
In which types of funding is this change possible?	You can apply for this change in all funding opportunities except for the funding to strengthen university research profiles.
When do I apply?	Apply after the funding decision has been made and before the funding period starts, or during the funding period.
After the decision on the change, do I need an electronic approval by the site of research?	No (original site of research) Yes (new site of research)
NB!	<p>Changing departments etc. within the same university is not regarded as a change of site of research. Such a change is an internal affair at the site of research.</p> <p>Notify the change of department to the Academy's Registrar's Office. The Academy will add the information to the online services. Even if the new department within the site of research has different percentages than the original site, the cost percentages will not be changed. If the percentages at the new department are lower than in the decision, the site of research still has to submit the payment requests to the Academy according to the lower percentages based on the accounting.</p> <p>If funds have been used, the change of the site of research cannot be implemented in the middle of the payment period. The change must be scheduled to take place at the beginning of the next payment period, i.e., starting from January, May or September. The application to change sites can also be submitted earlier.</p> <p>The decision to change sites of research is made afterwards only after the last payment request by the original site of research concerning the funding decision has been submitted to the Academy and paid. Advance payments are not regarded as using funds, since advances for projects nearing completion will be returned to the Academy.</p> <p>If necessary, contact us for more information.</p> <p>If necessary, we may consult the site of research or other parties before making the decision. The procedure for processing appeals may differ from the one presented here, if so required by the Finnish Administrative Procedure Act or any other legislation.</p>
The application for the change is submitted by the project PI in the Academy's online services. In exceptional cases, the application can also be submitted by the site of research or some other party as referred to in the Administrative Procedure Act.	

(5) Declining research grant in full

Description of the change	You can apply to decline a research grant (incl. salaries for research posts) in full if you do not want to receive the funds or if you want to forgo the funds before they are used. Please notify us of this immediately.
Guidelines for the online services	Justify the proposed change in the free-text field.
Appendices required	No appendices required
In which types of funding is this change possible?	You can apply for this change in all funding decisions.
When do I apply?	Apply in the year of the decision and before the start of the funding period.
After the decision on the change, do I need an electronic approval by the site of research?	No
NB!	If necessary, we may consult the site of research or other parties before making the decision. The procedure for processing appeals may differ from the one presented here, if so required by the Finnish Administrative Procedure Act or any other legislation. Advance payments are not regarded as using funds, since advances for projects nearing completion will be returned to the Academy.
The application for the change is submitted by the project PI in the Academy's online services. In exceptional cases, the application can also be submitted by the site of research or some other party as referred to in the Administrative Procedure Act.	

(6) Declining research grants midstream

Description of the change	You can apply to decline a research grant midstream, i.e. while the funding period is still running. If a person who has been granted Academy funding for a research post cannot continue in the post (e.g. because of a transfer to another task), they must immediately notify the Academy and decline the funding.
Guidelines for the online services	1) Justify the proposed change in the free-text field. 2) Fill in the new end date for the funding period and the costs incurred so far on the tab Realised costs. and the costs incurred so far Also give an estimate of the costs to be invoiced for the last payment period.
Appendices required	1) Account of costs incurred Append to the application an account of costs incurred in the project prepared by the financial administration of the site of research.
In which types of funding is this change possible?	You can apply for this change in all funding decisions.
When do I apply?	Apply during the funding period.

After the decision on the change, do I need an electronic approval by the site of research?	No
NB!	If necessary, we may consult the site of research or other parties before making the decision. The procedure for processing appeals may differ from the one presented here, if so required by the Finnish Administrative Procedure Act or any other legislation. Advance payments are not regarded as using funds, since advances for projects nearing completion will be returned to the Academy.
The application for the change is submitted by the project PI in the Academy's online services. In exceptional cases, the application can also be submitted by the site of research or some other party as referred to in the Administrative Procedure Act.	

(7) Changing principal investigators

Description of the change	You can apply to change principal investigators on exceptional and justified grounds.
Guidelines for the online services	Justify the proposed change in the free-text field.
Appendices required	<ol style="list-style-type: none"> 1) Justifications signed by both the previous and the new PI as well as a consent by the site of research Append to the application a free-form letter with justifications for the change, signed by the previous and the new PI, as well as a consent to the change from the site of research. 2) List of publications and CV for the new PI Also append the new PI's list of publications and CV.
In which types of funding is this change possible?	You can apply for this change in all funding decisions except in those which involve personal salaries. This means that changing PIs is not possible in funding for research posts as Academy Professor, Academy Research Fellow or Postdoctoral Researcher, in funding for clinical researchers or in personal grants.
When do I apply?	Apply during the funding period.
After the decision on the change, do I need an electronic approval by the site of research?	Yes
NB!	<p>The new PI must be registered in the Academy's online services.</p> <p>If the PI takes a leave of absence from the post but still continues as head of the project, they must negotiate substitute arrangements with the site of research. A document describing these management arrangements and indicating the substitute must be delivered to the Academy's Registrar's Office.</p> <p>If necessary, we may consult the site of research or other parties before making the decision. The procedure for processing appeals may differ from the</p>

	one presented here, if so required by the Finnish Administrative Procedure Act or any other legislation.
The application for the change is submitted by the project PI in the Academy's online services. In exceptional cases, the application can also be submitted by the site of research or some other party as referred to in the Administrative Procedure Act.	

(8) Changing decision conditions or purpose of use, substantially changing the research or action plan

Description of the change	<ol style="list-style-type: none"> 1) Changes in decision conditions or purpose of use can be applied for only on special grounds. 2) Substantial changes in research or action plans can be applied for only on special grounds.
Guidelines for the online services	Justify the proposed change in the free-text field.
Appendices required	Case-specific appendices
In which types of funding is this change possible?	You can apply for this change in all funding decisions.
When do I apply?	Apply after the funding decision has been made and before the funding period starts, or during the funding period.
After the decision on the change, do I need an electronic approval by the site of research?	Yes
NB!	<p>Please always first contact us for more information.</p> <p>If necessary, we may consult the site of research or other parties before making the decision. The procedure for processing appeals may differ from the one presented here, if so required by the Finnish Administrative Procedure Act or any other legislation.</p>
The application for the change is submitted by the project PI in the Academy's online services. In exceptional cases, the application can also be submitted by the site of research or some other party as referred to in the Administrative Procedure Act.	

(9) Changing funding proportions of consortium subprojects

Description of the change	You can apply to change the funding proportions of consortium subprojects. The total funding for the consortium must not change.
Guidelines for the online services	<ol style="list-style-type: none"> 1) Fill in the new funding proportions (the Academy's portion) for the consortium parties. 2) Justify the proposed change in the free-text field. 3) On the tab New cost estimate, change each consortium party's cost estimate (by type of expenditure) in accordance with the proposed change. <p>The sum remaining in the counter must be 0, otherwise the application cannot be submitted.</p>

Appendices required	<p>1) Consent by the PI and the site of research of the subproject that will forgo the funding.</p> <p>Append to the application a free-form letter with the original site's and the PI's consent to the change.</p> <p>2) Commitment by the site of research of the subproject that will receive funds</p> <p>Also append a free-form letter where the site of research commits itself to overseeing and funding the project and to following the Academy's conditions for the use of funds.</p>
In which types of funding is this change possible?	You can apply for this change in the case of Academy Programme funding, funding for research infrastructures and programmes by the Strategic Research Council (SRC).
When do I apply?	Apply after the funding decision has been made and before the funding period starts, or during the funding period.
After the decision on the change, do I need an electronic approval by the site of research?	Yes
NB!	<p>If funds have been used, the decision on the proposed change cannot be made in the middle of the payment period. The appeal must be scheduled to the beginning of the next payment period, i.e. 1 Jan–30 Apr, 1 May–31 Aug or 1 Sep–31 Dec. The change can be made as of 1 Jan, 1 May or 1 Sep, respectively.</p> <p>The decision to change funding proportions is made afterwards only after the payment request for the ongoing payment period by the original site of research concerning the funding decision has been submitted to the Academy and paid. Advance payments are not regarded as using funds, since advances for projects nearing completion will be returned to the Academy.</p> <p>If necessary, contact us for more information.</p> <p>If necessary, we may consult the site of research or other parties before making the decision. The procedure for processing appeals may differ from the one presented here, if so required by the Finnish Administrative Procedure Act or any other legislation.</p>
<p>The application for the change is submitted by the consortium PI in the Academy's online services. The consortium PI must have the consent to do so from the subproject PI(s) and the site(s) of research. In exceptional cases, the application can also be submitted by the site of research or some other party as referred to in the Administrative Procedure Act.</p>	

(10) Changing Academy Research Fellow funding decision into a co-funded decision

Description of the change	<p>1) The salary of an Academy Research Fellow may also be co-funded, where appropriate in terms of supporting the researchers career advancement. In such a case, at least 70% of the funding granted by the Academy (see above) must be used for the salary, and the remaining 30% can be covered from other funding sources. Other funding sources may</p>
----------------------------------	---

	<p>account for no more than 30% of the salary. For those who have received funding from the European Research Council (ERC) the corresponding contribution is 50%. This requires that the externally funded salary part has been allocated to research tasks or other tasks in support of the researcher's career, such as tasks that are part of the university's tenure-track system. The Academy's funding that is freed as a result of this co-funding can be used for the project's other research costs, which are justified separately.</p>
Guidelines for the online services	<p>As type of change, select "Changing decision conditions or purpose of use, substantially changing the research or action plan". Justify the proposed change in the free-text field.</p>
Appendices required	<p>When an Academy Research Fellow applies to change the funding of their annual salary:</p> <p>1) Free-form justification letter</p> <p>Append to the application a free-form letter briefly describing the form of co-funding (e.g. provide a description, the dates and percentages of a tenure-track position). The non-Academy-funded part can be no more than 30% annually. For those who have received funding from the European Research Council (ERC) the corresponding contribution is 50%. In addition, you must describe how the co-funding promotes your research career and supports your post as Academy Research Fellow.</p> <p>2) Document stating the non-Academy-funded salary amount</p> <p>Append to the application a document showing the amount of other funding (e.g. decision notification, employment contract, other free-form certificate).</p>
In which types of funding is this change possible?	<p>This change is possible in decisions on funding for a research post as Academy Research Fellow.</p>
When do I apply?	<p>Apply after the funding decision has been made and before the funding period starts, or during the funding period.</p>
After the decision on the change, do I need an electronic approval by the site of research?	<p>Yes</p>
NB!	<p>Please always first contact us for more information.</p> <p>You must justify the intended use of the funds freed from the salary funding. The proportion freed from the salary costs cannot be used to cover costs already funded under the decision on funding for Academy Research Fellow research costs. The proportion may be used to cover other costs, which must support the implementation of the original research plan. This means that it may be used for a part of the research that otherwise would not be possible when the Academy Research Fellow works part-time in other tasks.</p> <p>3) The partial funding must come from other sources than the funding granted by the Academy.</p>

	<p>4) The co-funding will not be accepted if the Academy Research Fellow has received a full professorship or some other senior-level research post at research organisations during the funding period.</p> <p>5) If necessary, we may consult the site of research or other parties before making the decision. The procedure for processing appeals may differ from the one presented here, if so required by the Finnish Administrative Procedure Act or any other legislation.</p>
<p>The application for the change is submitted by the project PI in the Academy's online services.</p>	

(11) Changing Academy Professor funding decision into a co-funded decision

Description of the change	<p>1) The salary of an Academy Professor may also be co-funded, where appropriate in terms of the research. Then, 0–100% of the Academy-granted funding may be used for the Academy Professor's salary. Depending on the percentage, the salary may come partly or wholly from other sources. The Academy's funding that is freed as a result of this co-funding can be used for the project's other research costs, which are justified separately.</p>
Guidelines for the online services	<p>As type of change, select "Changing decision conditions or purpose of use, substantially changing the research or action plan". Justify the proposed change in the free-text field.</p>
Appendices required	<p>When an Academy Professor applies to change the funding of their annual salary:</p> <p>1) Free-form justification letter</p> <p>Append to the application a free-form letter briefly describing the form of co-funding, the dates and percentages. The percentage of other funding sources has not been limited. Also, describe how the co-funding will promote the research and support the Academy Professor post.</p> <p>2) Document stating the non-Academy-funded salary amount</p> <p>Append to the application a document showing the amount of other funding (e.g. decision notification, employment contract, other free-form certificate).</p>
In which types of funding is this change possible?	<p>You can apply for this change in funding decisions that concern a research post as Academy Professor.</p>
When do I apply?	<p>Apply after the funding decision has been made and before the funding period starts, or during the funding period.</p>
After the decision on the change, do I need an electronic approval by the site of research?	<p>Yes</p>
NB!	<p>Please always first contact us for more information.</p> <p>You must justify the intended use of the funds freed from the salary funding. The proportion freed from the salary costs cannot be used to cover costs already funded under the decision on funding for Academy Professor research</p>

costs. The proportion may be used to cover other costs, which must support the implementation of the original research plan. This means that it may be used for a part of the research that otherwise would not be possible when the Academy Professor works part-time in other tasks.

3) The partial funding must come from other sources than the funding granted by the Academy.

4) If necessary, we may consult the site of research or other parties before making the decision. The procedure for processing appeals may differ from the one presented here, if so required by the Finnish Administrative Procedure Act or any other legislation.

The application for the change is submitted by the project PI in the Academy's online services.

Information about the funding terms and conditions

These terms and conditions are based on a document approved by the Board of the Academy of Finland presenting the Academy's criteria for research funding decisions, last adopted on 11 April 2019. The document is available on our website (in Finnish). These funding terms and conditions apply to funding calls implemented between 1 September 2019 and 31 August 2020 and to funding decisions based on these calls.

Riitta Maijala, Vice President for Research, approved the Finnish-language terms and conditions on 28 May 2019.
