

4 APPENDICES TO THE NOS-HS CALL FOR APPLICATIONS

Appendix 1, WORKSHOP PLAN TEMPLATE

The following information must be included as a separate pdf-file (*Tab 6*). Please use the following structure with subheadings and numbering. The plan must be written in 12 pt Times New Roman or similar and it must not exceed 6 pages.

1. Novelty of the project

- Describe the scientific contents of the workshops briefly. Explain the planned research initiative, including ideas for research topics, theories, methods and analyses. If relevant, present any ethical issues raised by the research and explain how they will be addressed.
- Give a clear description of the novelty of the project.
- If you have previous or currently applied grants for the same research idea, describe how this proposed project differs from them. Note: since novelty is a key funding criterion, funding will not be granted for ongoing research projects with the same content.

2. Added value

- Nordic added value: describe the Nordic added value including why the series of exploratory workshops must be organized at a Nordic level.
- Overall added value: describe the added value of the research initiative in relation to the research community and society at large.

3. Participants

Explain how and how many workshop participants with different researcher career stages and different backgrounds will be included. Explain why these participants are important for the project.

- Junior researchers: explain how early stage researchers will be included in the project.
- Actors from outside the academia: describe the role and contribution of the non-academic stakeholders involved (if relevant).

4. Activities and milestones

The activity description is short and concise. Summarize the main activities and milestones of the project, for example:

- **Workshop series programme:** present suggested programme for the workshop series, including the purpose of the individual programme items. It is important to explain how the planned workshop topics and programmes contribute to the general research idea.

- **Dissemination of results:** present a plan for dissemination and communication of the results of the workshop series to the research community and the general public.
- **Preparation of applications** to international research programmes (e.g. to the European Commission's framework programme) if applicable.
